PERFLUOROCARBON COMPLIANCE (PFAS, PFOS, PFOA)

Based upon currently published information and a review conducted by our chemical supplier, none of the chemicals used in our Electroplating process contain perfluorocarbon compounds. This means no PFAS, PFOS or PFOA chemicals are used.

Please use this certificate as our assurance that plated components do not contain listed substances.

Sincerely,

A handwritten signature in black ink that reads "Matt Morris". The signature is written in a cursive, slightly slanted style.

Matt Morris
